Research Interest

- Data-centric AI opens the door to Artificial General Intelligence (AGI). I'm interested in developing new algorithms and theories (e.g., contrastive learning, generative learning) to effectively leverage data, thereby improving model generalization and robustness.
- Multi-modal alignment and robustness (Jailbreaking, Adversarial attack and robustness, and Hallucinations) in large models including LLMs and VLMs.
- I'm glad to touch on new problems related to machine learning, like AI for science, and 3D problems.
